

Comfort Cradles
Windshield Suction Mounts

BURY Automotive Cradle with Windshield Mount for BlackBerry® smartphones

- **You travel. You use BlackBerry Maps or other GPS mapping applications. You value a BlackBerry smartphone which is always charged - but more importantly you value your safety on the road.**

Bury Comfort Cradles and windshield suction mounts allow you to charge your BlackBerry smartphone while driving, and are portable enough to travel with - for use in rental cars. No need to rent GPS navigation systems when you travel - simply bring your BlackBerry, Bury cradle and windshield mount along.

Most importantly, these kits allow you to keep your hands on the wheel - you can utilize a mono Bluetooth headset, Bluetooth car kit or speakerphone for voice calls. And, when you are using a GPS mapping application, the device is held in place for you to glance at, while keeping the road in your peripheral vision.
