3 *Craning your neck during extended phone calls can lead to improper cervical alignment. The result can be reduced blood flow and accelerated muscle fatigue. Plantronics headsets eliminate this problem by freeing you to move and sit more naturally.*

PLANTRONICS

If you spend a lot of time on the phone, your next call should be to your Plantronics dealer

*Your body
will
thank you*

2 *When you hold the phone like this, it can be very stressful on your neck, too, often causing muscle spasms and stiffness. But with a Plantronics headset, you can keep your neck in an upright position. You'll appreciate the difference immediately.*

Handsfree

For years Plantronics has been working on designing headsets that let people work with the ultimate in freedom and comfort. Today our headsets are used by everyone from air traffic controllers and call center personnel to stock brokers and anyone else who spends much of their day on the phone.

Thanks to these ongoing efforts, we've sold over 25 million headsets. Not simply because we're developing new headset applications, but because more and more people are discovering what they've been missing: the freedom and comfort that only a Plantronics headset can offer.

Of course different people work in different ways. So we supply a wide range of sizes, styles and fits. You can choose from over-the-ear and over-the-head designs. And you can select from monaural or binaural models. But regardless of which model you choose, they all have two things in common: unprecedented comfort and clarity.

Plantronics DuoSet™ Headset

Our most versatile, the Plantronics DuoSet headset is ideal for the first-time user.

- Easily converts from over-the-ear to over-the-head use, making it an excellent choice for first-time users
- Automatic noise-canceling technology for clear voice reception in busy office environments
- Unique SoundGuard® Plus™ and Call Clarity™ technology for superior sound quality

* Plantronics telephone amplifier is required for most corded phones.

Plantronics Encore® Headset

Our top-of-the-line headband model that offers all-day comfort and superior sound quality.

- Lightweight monaural and binaural designs for comfortable extended-wear phone use
- A selection of ear cushions for all-day comfort
- SES® Sound Enhancement System for control over bass and treble settings—providing fuller and richer tone
- Unique SoundGuard® Plus™ and Call Clarity™ technology for superior sound quality
- 10-foot cable with popular "Quick-Disconnect" option

* Plantronics telephone amplifier is required for most corded phones.

Plantronics TriStar® Headset

The TriStar headset is our most stable, over-the-ear headset. It's so comfortable, you'll forget you're wearing it.

- Advanced three-point design gives users support behind, on top of, and on the ear
- Selection of four ear bud sizes
- SoundGuard® Plus™ and Call Clarity™ technology for superior sound quality
- 10-foot cable with popular "Quick-Disconnect" option

* Plantronics telephone amplifier is required for most corded phones.

Plantronics M12 Amplifier

The M12 connects Plantronics headsets to nearly any single- or multi-line phone.

- Adapts to nearly all telephones and supports a wide range of Plantronics headset models
- One-button control allows switching between headset and handset
- Separate controls to adjust outgoing and incoming volume
- SoundGuard® Plus™ technology delivers automatic sound protection by keeping incoming sounds at comfortable hearing levels
- Call Clarity™ technology for enhanced sound quality

Plantronics M130 Series Headsets

These headsets offer superior comfort for hands-free conversations with cordless and mobile phones.

- Comfort-adjust earloop provides a perfect fit
- Noise-canceling microphone for superior sound and clarity
- Plantronics RF Noise Shield™ reduces annoying RF static
- Adjustable microphone boom and adjust switch for optimal voice output
- M135 headset includes inline volume and mute controls

Plantronics CA10 Cordless Telephone Headset Amplifier

This cordless amplifier is ideal for hands-free mobile conversations.

- 900 MHz hands-free mobile design with range of up to 150 feet
- Adjustable volume, channel change and mute feature
- Comes standard with a special 2.5mm to Quick Disconnect™ cable that supports standard H-top headsets
- Connects to single- or multi-line corded telephone for easy installation
- Remote call answering with optional Plantronics Handset Lifter (HL1)

So which headset is right for you or your employees?

Well, the best way to determine that is to learn about some of the features that separate one model from another. Some of our more popular models fit over the ear, and come with a variety of options to ensure that you enjoy the custom fit you need for maximum comfort—including soft foam cushions and pliable rubber earbuds. Naturally these headsets can be worn on either ear.

We also have models that fit comfortably in your ear. Monaural headsets deliver sound to one ear and are an ideal and economical choice for most work environments. If background noise is an issue, a binaural model that delivers sound to both ears can be a huge benefit. But regardless of which version you select, you can count on excellent sound quality and comfort.

Take a look at some of our most popular models and see which ones have the features you prefer. If you'd like more information, please contact your authorized Plantronics dealer.
