

HCB-100

Bluetooth™ Car Speakerphone

Attach, connect and call

The HCB-100 offers a simple solution for in-car call handling. Just attach it to your car's visor and turn the microphone in the direction of your mouth. You can handle calls through the easily distinguishable buttons without losing focus on the road ahead. When you are done driving, you remove the speakerphone, which can then be used as a convenient desk stand for smaller phone meetings in your office or at home. The long talk and standby times and the clear digital sound quality make this a reliable partner to your Bluetooth™ mobile phone.

Sony Ericsson

HCB-100

Bluetooth™ Car Speakerphone

Simplicity meets high performance.

Handling calls in the car does not have to jeopardize your safety in traffic. With the HCB-100 you can keep your eyes on the road ahead and still take, make and reject calls. Just attach it with a sturdy clip to the visor of your car and turn the microphone in the direction of your mouth.

The HCB-100 connects to your mobile phone wirelessly through the Color ID feature. Easily distinguishable buttons allow you to handle calls without losing focus on traffic. Tested for the demanding audio environment in your car, the HCB-100 has clear digital sound and extremely high performance (up to 15 hours talk time). The compact size allows you to detach it

and carry it with you when you are done driving. It also serves as a convenient desk stand for a smaller phone meeting in your office or at home. Using the Bluetooth™ 1.2 version, the HCB-100 is compatible with Bluetooth™ phones from Sony Ericsson and other brands.
